

Release Notes - [Stock n' Load] Version [1.50]

Date: [4/12/2024]

We are excited to announce the latest updates to our stock tracking website. This week, we focused on enhancing both the aesthetics and functionality of our platform. Below are the key updates included in this release:

Enhancements

- **Login and Register Pages Redesign:**
 - Implemented new CSS styling to improve the visual appeal and user experience.
 - Enhanced interactivity of the forms.
- **Backend Integration:**
 - Added full backend support for the Login and Register pages, enabling a seamless user authentication process.
 - The Search page now fully interacts with the backend, allowing for real-time stock searches although the frontend remains in development for a more polished look.

Ongoing Developments

- **Portfolio Page:**
 - Currently developing the Portfolio page which is in its initial stages and features a basic layout. Planned enhancements include interactive charts and real-time stock updates.
- **Search Page:**
 - Currently developing the Search page which is in its later stages and features a basic layout. Planned enhancements include interactive favorites and a better design.
